When will we do this activity:

Who else can do this activity with my child:

How to do this activity:

1. Use **Ready for Play and Learning** to see if your child is ready to play and learn. Remember to use **5 Steps to Success** as you help your toddler explore their natural curiosity during the activity.
2. Gather a cloth bag or basket and walk around your home with your child. Help them collect 3-4 safe objects that spark their curiosity, and that are the **SAME** color. Many parents like to encourage their children to gather some basic care items like a hairbrush, washcloth, toothbrush, etc .
3. As your toddler collects the objects and places them in their bag/basket, talk with them about the item's color and what the object is or how they can use the item during their basic care routines.
4. Once they've gathered all the objects, help your child use the items as props to make up a story about all the fun things they collected in their bag/basket.
